## Overview

I am an aspiring Full-Stack Developer who loves turning ideas into real projects. I enjoy working with React, Next, JavaScript, HTML, and CSS to build clean, responsive applications. A quick learner with a strong problem-solving mindset and a foundation in C++ and C, I am always eager to learn, grow, and contribute to meaningful projects. I'm comfortable with debugging, version control, and writing clean, maintainable code, and I make it a point to grow with every new project, task, or challenge I take on.

## Education

<b>Bachelor of Computer Applications (IGNOU)</b>	2022 – 2025 (6th Semester) (6.18 CGPA)
<b>Senior Secondary (PCM) (CBSE)</b>	2022
<b>High School (CBSE)</b>	2020

## Technical Skills

**Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Redux Toolkit, React Router, Framer Motion.

**Backend:** Node.js, Express.js, MongoDB, PostgreSQL, Redis, Appwrite, Docker, NestJS (Learning).

**Tools & Platforms:** Git, GitHub, VS Code, Chrome DevTools, Figma, Vercel, Render.

**CS Concepts:** OOP, Authentication, APIs, JWT, Responsive Design, Debugging.

## Projects

**ShareME** | *Next Js, Node Js, MongoDB, Redis, Material Js, Docker*

[Live Link](#)

- Developed a seamless file & text-sharing platform using a **4-digit secure access code**, no direct sharing link required.
- Integrated Cloudinary for file uploads and secure delivery.
- Used MongoDB TTL for auto-deleting files after 30 minutes.
- Improved performance using Redis caching and ensured scalable deployment with Docker

**School Management System** | *Next Js, Node Js, MongoDB, Material Js*

[Live Link](#)

- Developed a scalable **School Management** platform as part of a team project.
- Built a dashboard for managing students, teachers, classes, and subjects with **CRUD** operations
- Role-based access control for secure and structured workflows.
- Created a dynamic, reusable form component to handle multiple entity types.
- Added Auth Guards and Role Guards for protected routing and admin-level privileges.

**Flour and Flavor - Cake Ordering Web App** | *React.js, Redux Toolkit, Tailwind CSS, Appwrite,*

[Live Link](#)

- Build a cake selling site that offers multiple offers Custom Cake, Cart System, Secure Authentication.
- Offline Persistence: Cart data is also stored in **local Storage** for an uninterrupted experience.
- Integrated React Hook Form for efficient form management and validation
- Used **Appwrite** for **authentication** and backend services with real-time syncing
- Styled with Tailwind CSS and deployed via **Vercel** for responsiveness.

**TitleCase Chrome Extension** | *React.js, JavaScript,*

[Github Link](#)

- Created a productivity browser extension that instantly converts selected text into Title Case format.
- Uses browser APIs for instant integration with user selection.
