Overview

I am an aspiring Full-Stack Developer who loves turning ideas into real projects. I enjoy working with React, JavaScript, HTML, and CSS to build clean, responsive applications. A quick learner with a strong problem-solving mindset and a foundation in C++ and C, I am always eager to learn, grow, and contribute to meaningful projects. I'm comfortable with debugging, version control, and writing clean, maintainable code, and I make it a point to grow with every new project, task, or challenge I take on.

Experience

Frontend Developer (with Full-Stack Exposure)

Edusphere – Remote | July 2025 – Present

Key Responsibilities

- Developed and maintained responsive, scalable frontend applications using React.js, Tailwind CSS, Material js, Framer motion.
- Collaborated with backend team, occasionally contributing to Node.js/Express APIs and ensuring smooth frontend-backend integration.
- Tested and debugged REST APIs using Postman, and console-based testing for faster iteration.
- Worked in a fast-paced startup environment, taking ownership of end-to-end features from UI/UX to deployment.

Key Achievements

- Built a modular Dashboard component that unified multiple dashboards into a single solution, reducing code duplication by 10% and significantly improving code reusability and maintainability.
- Helped accelerate product delivery by supporting both frontend and backend during critical releases.

Education

Bachelor of Computer Applications (BCA)	**2022 – 2025** (expected)
Senior Secondary (PCM) (CBSE)	**2022**
High School (CBSE)	**2020**

Projects

Flour and Flavor - Cake Ordering Web App| *React.js, Redux Toolkit, Tailwind CSS, Appwrite,* **Live Link**

- Build a cake selling site that offers multiple offers Custom Cake, Cart System, Secure Authentication.
- Offline Persistence: Cart data is also stored in local Storage for an uninterrupted experience.
- Styled with Tailwind CSS and deployed via Vercel for responsiveness.

Animated Landing Page | *React.js, Tailwind CSS, Motion* **Live Link**

- Built a modern, animated landing page with smooth transitions.
- Included direct inquiry via WhatsApp for easy contact.

TitleCase Chrome Extension | *React.js, JavaScript,* **Github Link**

- A productivity browser extension that instantly converts selected text into Title Case format.
- Built with HTML, CSS, and JavaScript.

Technical Skills

Frontend Technologies: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Redux Toolkit, React Router, Motion
Backend Technologies: Node.js, Express.js, MongoDB
Developer Tools: VS Code, Git, GitHub, Chrome DevTools, Figma (Basic)
